Engine Options and Performance

The 1996 Jeep Cherokee primarily came with two engine options, both renowned for their durability:

- 2.5L I4 AMC161 Engine:** This four-cylinder engine was standard in base models. Known for its simplicity and fuel efficiency, it produces approximately 125 horsepower and 150 lb-ft of torque. Its straightforward design makes it easy to maintain and repair.

The availability of a manual transmission, specifically a 5-speed manual gearbox (NV3550), was primarily paired with the 4.0L engine. This combination provided drivers with a more engaging driving experience and enhanced control, especially in challenging terrains.

Transmission Details and Benefits
